

# AdherePack™ by AdhereRx

## Seamless, Supportive Medication Management with AdherePack by AdhereRx

High-risk, high acuity patients struggling with medication adherence are difficult to care for – and retain. High staff turnover, lack of communication between primary and specialty care providers, and even transportation barriers can result in missed doses, drug therapy problems (DTPs), and unplanned hospitalizations.

We've combined AdherePack's customized medication packaging with comprehensive telepharmacy support and continuous care team coordination to improve adherence for homebound patients who need additional tools to manage their medication routines, helping them avoid difficult hospitalizations and maintain their independence.

Research shows that **fall risk increases by 18% in elderly patients taking 4+ medications.** This risk increases to **50% in patients taking 10+ medications.** But regular medication reviews have been **proven to reduce falls** in this population.

### What We Do For You

#### Seamless Care Transitions

Patient-centric medication management tools keep complex routines on track despite changes in patient care.

#### Safe Accessible Adherence Tools

Continuous engagement with licensed pharmacists so care teams can focus on their patients, not their meds.

#### 24/7 Pharmacy Support

Comprehensive telepharmacy support to improve patient outcomes and help your care teams manage risk.

### What We Do For Your Patients

#### Personalized Medication Reviews

Licensed pharmacists check in with patients every month to proactively identify potential DTPs.

#### Quick and Easy Sign-Up

Licensed clinicians coordinate across providers and care teams to ensure medication safety and accuracy.

#### Customized Medication Packaging

We pre-sort and package all patient medications by dose date and time and deliver them to their door contact-free.

## Who Would Benefit from AdherePack?

Patients with multiple chronic conditions and complex or changing medication routines

Busy caregivers who struggle to manage their loved ones' difficult medication routines

Care teams that experience frequent communication breaks or staffing transitions

Home health providers who want to ensure their patients take the right meds at the right time

## AdherePack Features

**Medication synchronization** for accuracy and convenience

All patient medications **packaged by dose date and time**

**Care team coordination** for improved care transitions

**Monthly Comprehensive Medication Reviews (CMRs)**, proven to reduce falls

**Monthly Drug Utilization Reviews (DURs)** to proactively manage medication risks

**HIPAA-compliant private courier** for contact-free, direct-to-door delivery

**Next-day delivery** any time medications change

**24/7 support** from our licensed telepharmacy team

**No additional cost to patients**, just their regular copay.

## Ready to Learn More?

As a partner, your job is simple. We will set you up with a complete home healthcare partnership package – including cobranded brochures and sample compliance packaging – so that your care teams can identify and refer eligible patients. We will send you regular updates on your enrolled patients, outlining their adherence to their medication regimens.

Once a patient is referred to the program, we reach out to them directly to answer their questions and help them determine if AdherePack is right for them.

## About AdhereRx™

AdhereRx is a digital pharmacy with compliance packaging capabilities that serves high-risk patients with barriers to care that cause habitual medication non-adherence. Founded in 2002, we help patients with complicated health conditions or illnesses take control of their medication routines. Our goal is to provide every patient with the tailored help and dedication they need to stay healthy and avoid future health risks due to medication issues.
